***Objections***

1. The declaration filed January 10, 2006, is objected to because it was not executed in accordance with either 37 CFR 1.66 or 1.68. Appropriate correction is required.

***Election/Restrictions***

2. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

- I. Group I, claim(s) 14-21 and 27, drawn to a method of building and covering an assembly of substrates.
- II. Group II, claim(s) 22-26, drawn to a method of mixing and applying paste to a substructure.
- III. Group III, claim 28, drawn to a curable composition.

3. The inventions listed as Groups I-III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

The only common technical feature of Groups I-III, viz., curable epoxy pastes having thixotropic properties and a latent or semi-latent hardener, are well known in the art as adhesives, encapsulants, and sealers, as evidenced by Hayes et al. (US 6,077,886: col. 1, L. L. 3-10; col. 2, L. 33-40) and Wanthal et al. (US 6,060,540: Abstract; col. 1, L. 8-12, L. 15-19, L. 46-52; col. 2, L. 33-46; col. 5, L. 46-48; col. 6, L. 28-30). This common technical feature, being known in the art, is therefore not a special technical feature, such that Groups I-III do not relate to a single general inventive concept.
